

Upcoming Free Courses

Are you a Londoner who's currently unemployed or working a zero hour contract? Both sides of this sheet contain information about the upcoming FREE training opportunities available to kick-start your new digital/tech career!

Bootcamps - go from beginner to employment ready in 12 weeks or less! No previous experience required.

Apprenticeships - earn money while you learn. Apprenticeships are offered at different levels - the higher the level, the more advanced the qualification. Apprentices split their time between studying, and learning on the job.

Short courses - a great way to get the ball rolling and help you decide which path to take in future.

College courses - these are usually a full time commitment for 1-2 years. College courses are not listed on this sheet, but information can be found on our website - hub.careers/home
